REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of South Hampton:

Herewith I submit to you my third annual report together with the report of Miss Helen Thomas, School Nurse.

Miss Mary Mullen resigned at the end of last year to accept a position in Amesbury. Miss Florence Willis was appointed to take her place.

There were 40 pupils enrolled in the schools last year. This was 19 less than during the previous year. The attendance averaged 92.3 per cent of the membership, and was about two per cent below the average for the State for this period. The following table shows the attendance at the Barnard School during the past four years:

Number of pupils enrolled in 1926.....	42
Number of pupils enrolled in 1927.....	51
Number of pupils enrolled in 1928.....	59
Number of pupils enrolled in 1929.....	40

Five pupils were graduated from the eighth grade in June and four of these entered High School. It now frequently happens that nearly all of the graduates enter High School. The great majority of parents feel that their children should at least have a High School training. This is indicative of the conviction regarding actual worth of the time spent in High School. At the present time there are about twenty-five hundred High School graduates annually in N. H.; of these about one half go on to post secondary institutions. This indicates that the High School is no longer the end of educational necessities and desires.

An increasing number of school districts in this state have been arranging a school calendar which would provide for thirty-six actual weeks of school. We are at the present time about one week short of this deal.

The new desks in Mrs. Floyd's room have been greatly appreciated. Old desks have a poor writing surface and often make it impossible to produce neat papers. The heater was moved to the back of the Grammar room, thus increasing floor space in the front of the room as well as making it easier to see the front black-board. The new desks were given by the Trustees of the Barnard School, and I know that assistance of this kind is greatly appreciated. We are already looking forward to the time when the Trustees will be able to do for the Primary room what they did for the Grammar room last summer. The teachers will agree with me that something should be done to make the space in front of the school building dry and free from mud. Drainage and gravel surface would be a great improvement.

New Hampshire has had a decade of exceptional educational progress, and the State Board of Education, under the leadership of its chairman, Orton B. Brown, and State Commissioner, Ernest W. Butterfield has had an interesting and important review of the achievements of the ten years.

At a meeting held recently at the Concord High School and at which meeting nearly three hundred school board members and superintendents attended, the following facts were emphasized:

New Hampshire adopted a new school code in 1919, which has been in operation for ten years. The code has raised the quality of the schools in the less favored districts, financially. It magnified need of higher efficiency in the rural and elementary city schools. It gave added power and increased support to the State Department of Education, especially authorized it to create standards of attainment for secondary and private schools.

The code of 1919 provided equal length of school year for cities and rural communities, and no school in the state is in session less than thirty-six weeks. Now boys and girls in the most remote districts in New Hampshire are as well prepared for high school as those of the cities. The high school attendance increased forty per cent in ten years, and twice as many high school students go

to college as ten years ago. The high school enrollments have increased six times as many as in elementary schools.

In 1919 few one-room schools had a teacher who had a normal school education; now a majority of these schools are taught by normal school graduates. In 1919 many children were far from high school opportunities; now 90 per cent are within easy driving distance of a high school. Now all schools have the advantage of school superintendents who are college graduates, who have taught at least five years, who have satisfactory personal and professional records, and give their entire time to school supervision.

No new untrained teachers are employed and only untrained teachers of successful experience are retained.

Before 1919 one-fifth of the schools changed teachers during the year. The mid-year change of teachers in 1919 was 540. In 1929 it was only 98.

In nothing has there been greater progress than in the professional service rendered by the State Normal Schools at Plymouth and Keene. They are graduating students from the four-year course and every graduate is engaged in the state at once. They also graduate students from two-year and three-year courses for elementary and junior high schools, and they are all employed in the state.

In only eight of the forty-eight states is the state tax for local public schools as low as in New Hampshire. In the State five times as much tax money is paid teachers as is expended for school buildings; and twenty-six times as much for teachers as for all administrative expenses.

The children and teachers at South Hampton are well equipped with modern books and supplies. School books were never so attractive and interesting as at the present time. Parents have noticed this and often speak about it.

The work of the schools is progressing well this year. Achievement tests given at intervals, show that good progress is being made. Our schools are engaged in moral training all day long. Character education is a by-product of all other education and far more important

than the direct product. Children reflect in their behavior the influences that reach them. To spend five or six hours a day in a classroom where the virtues of courtesy, politeness, kindness, sympathy, unselfishness, thoughtfulness, orderliness, truthfulness, sincerity, industry, patience and justice are practised unconsciously, is of inestimable moral value.

In conclusion I would thank the School Board for their generous support and commend the time and energy that they have expended so generously for the good of the schools. I would also commend the effective and loyal work of the teachers in guiding the pupils forward on the road to citizenship. The work of the year has been very pleasant.

Respectfully submitted,

WILLIAM J. NELSON,

Superintendent of Schools.

REPORT OF SCHOOL NURSE

Number of pupils examined, 38.

Number of pupils absent, 1.

Underweight, 10%, 4.—5 treated since last examination.

Defective vision, 3—2 treated since last examination.

Defective hearing, 1.

Nervous condition, 1.

Defective teeth (second set) 18—6 treated since last examination.

Defective breathing, 2.

Diseased tonsils, 10.

Enlarged Glands, 2.

Pediculosis, 3.

Skin disease, 1.

Number vaccinated, 38.

Number visits to schools, 24.

Number visits to homes, 8.

Weight charts placed in each school room.

Weight records sent home to parents.

Children re-weighed each month. Re-examined, 38.

Notices of above defects sent to parents.

The children in the Barnard Schools are well up to the standard, in regard to weight and weight gains, only four, being 10% underweight which is five pounds or over. With the new set of scales which are a part of the equipment of the school, the work is made easier, and weights can be checked more frequently. The children are greatly interested and are encouraged to keep gaining as a means of promoting health.

I wish to thank the teachers, Superintendent and School Board who, by their kind co-operation helped to make the work a success.

Respectfully submitted,

HELEN W. THOMAS, R. N.,

School Nurse.
